

Ned English

Edward M. English, M.S.

Senior Survey Methodologist, NORC

Edward (Ned) English has considerable experience in sample design, geographic information systems (GIS), global positioning systems, and data analysis. English is the sampling task leader on some of the most important studies at NORC, including the National Children's Study and REACH US. English was formally trained as a geographer and so has extensive experience in the role of GIS and census data analysis with regard to survey methodology, sample design, and data visualization. English has played an important role in NORC's large-scale decennial National Frame project, which required considerable integration of statistical and geographic knowledge with census data. In addition, English has been responsible for mapping and GIS analyses for all major NORC projects, including the General Social Survey, the National Social Life, Health, and Aging Project, and the Survey of Consumer Finances. English received his master's degree in geography from the University of Wisconsin.
